Extra Premium features

Our PDF Embedder Premium plugin for WordPress provides a dynamic and elegant viewer for your website visitors, with added support for mobile devices.

Our plugins have a unique method for embedding PDFs, using Javascript only, and *not* using iframes or third-party services which can suffer outages. Upload PDFs and embed them straight into your site - just like adding images! PDFs will be automatically sized to their natural size and shape.

The PDF Embedder Premium version has extra features that are not available in the free version:

- Continuous scrolling between pages
- 'Download PDF' button allows users to obtain the PDF to read in their own choice of viewer
- Full screen button
- Fully functioning hyperlinks
- Jump straight to page by typing page number
- Track number of views and downloads
- Unbranded - no wp-pdf.com link
